We wholeheartedly believe that the fantasy gaming genre is fresher than ever, and we are strengthening the developer community by building a community of players by having the players themselves determine the development road. This game is built to give the player a pleasing medieval fantasy atmosphere, giving us all the feeling of being in the Lands Between, regardless of whether it is rich or poor. The development team of The Elden Ring has been bustling working to the goal of creating an epic fantasy RPG like no other. We at The Elden Ring are very excited about the future of EDaM and we would love to see you all take a turn on the keyboard next April!

What do you think about the game? Of course it is much more than just a casual review, so you can find reviews of other users in our discussion forum. POST INFO: I'll go through some of the first things that I encountered when I purchased the digital version of Elden Ring at 1/9/19 from IFC. PROGRAM When loading the game, there is a section before the in game world is displayed. There is a white area with a green background that shows the message "The New Fantasy Action RPG. Rise, Tarnished, and be guided by grace to brandish the power of the Elden Ring and become an Elden Lord in the Lands Between" The area moves to the left while the screen is scrolled up and soon becomes the in game area. The area of the in game content is full of basic elements like textures, objects, and enemy models. I believe that the scope of game design is changed to the Unity engine. DIALOGUE The in game conversation system is full of dialogue, which changes every time I play the game and stores the data on the disk for each time I play the game. Although some parts are simple, for example you can get information about the world or about specific events in the world. The game also has some symbols that are used for basic speaking. GRAPHICS AND SOUND The in game graphics are simple. Some details are only visible when you click on a specific object to go into a mode, such as the style of the grass. The graphics also change to show other scenes, such as when certain enemies appear. However, the color design of the in game graphics is decent. SOUND The sound is actually an essential element of games. Depending on the situation, the types of sound are used to create a certain experience in the game. In addition to enemies, they are also used for the environments. GAME MECHANICS The game begins with a standard JRPG tutorial. SECTIONS The game has a world map. From the left side, your in game map is displayed, and from the right side, the in game world map is displayed. On the map, there are four different locations: Eri (the initial area), Old Tomb (the route to the graveyard near the old keep), the Ruins (the area near the entrance to the bff6bb2d33
