What is it? HyperMotion Technology is what allows players to mimic what the athletes are doing in real life to enhance their natural movement. In FIFA 22, you see it everywhere. Players will be faster, more explosive, and aerially more skilled. HyperMotion Technology has passed the test. Players became more fast, accurate and balanced in every department: dribbling, shooting, passing, running and tackling. The feeling of being on the pitch is even more immersive than FIFA 21 thanks to the "FIFA on the Pitch" feature, which synchronizes the footsteps of players and creates a more dynamic interaction with the pitch. Why is it awesome? Because FIFA has always been about what real-life athletes are doing on the pitch. Since FIFA 1 in 1993, EA has focused on making each ball feel like a real ball, a physical object. HyperMotion Technology allows you to truly become the player. In FIFA 21, you made your kicks and shots in 1st person view. Now it's like you are a goalkeeper, you're a goalkeeper, and you do your shots... How do you enable this technology? EA Sport's programmers can simulate actual player movements in real-time to create a new physics engine and a new development workflow. The tech team can control the player's movement from point A to point B in a more accurate way than ever. This new system provides more realistic gameplay, but it is not just about realism. It's about the gameplay. This new technology allows the player to move in a more natural way. Here is one video showing you how much faster players will be. Check out this video of There are also some other cool things added with the new feature, like: Improved dribbling & Speed Control: Players can use a new Speed Control system to determine their running speed, so you can "cage" your opponent. This will help your players advance by using a technique called "Crush Time." Improved Agility: We've taken your speed, added an improved Agility system, and introduced a new element called Flick Control. When you flick the ball in certain directions, you can create opportunities to score or control the flow of a match. Improved Ball Control: We've also reworked the ball control system. Now you can use new elements called "Ball Sprints

## **Fifa 22 Features Key:**

- True Next-Gen Player Physics bring players to life with unprecedented characterisation, intelligent defensive systems, and high-performance animations.
- New Battle Simulation-Effects, which deliver a dynamic and immersive experience by letting players feel the impact of attacks and defensive pressure, and introducing a 'Virtuous Cycle' to the action when making tackles. Its expansion further increases pressure and improves the fluidity of play.
- A brand new physical style of gameplay; FIFA 22 introduces "Hyper Motion Technology." That means, we can now react to everyone on the pitch quickly, as well as all their movements and unpredictability. For example, we can now take advantage of the movement of the ball when a player chooses not to push the ball over the line, but rather completes the tackle, the defender then feels pressure to keep the ball in, which gives the player an opportunity to make a play.

Gameplay Improvements - FIFA 22 takes you to new heights with new aerial physics, a new crossing mechanic, and updated battle changes that puts your team into the ascendancy. New Passing System - Match the faster passing styles of the Premier League and Bundesliga, while still letting you decide the final outcome of every ball. Your players are the most important part of your tactics and now you can make them perform in all the right ways. New Threats in Tactical Defending - Eliminate penalty box opponents, create opportunities for your attackers, and confuse your enemies with a tactical back line. NEW ATTACKERS Check out the newly-released Attacking Stars from the Latest FIFA in FIFA 22: New Newcomer - Mike Grella (USA) - Grella will be a valued addition to any attack. His aerial strength and consistency allow him to do what no midfielder can - score from the air. He can also bring the right balance to any midfield, utilising his feet and dribbling ability to create and finish. NEW DEFENDERS FIFA 22 is set to introduce new defenders this year. Look out for: DaMarcus Beasley - Players will be able to create runs and use their pace to keep you in the game. He will also work tirelessly defensively for the team. Brad Guzan (USA) - Players will be able to attack with the ball at their feet, using the flicks, tricks and runs that have become an important part of his game. He will also create danger in the opposition box, scoring with pinpoint crosses. Clement Turpin (France) - The new crosser will be the master of his trade. He will increase his team's chances of scoring, and help them dominate the midfield. Parejo (Brazil) - His ability to control the centre of the park will cause major problems for your defence, while still providing you with consistent service from the wings. New Newcomers - Christian Pulisic (USA)
