Systemic gammaglutamyl peptide-induced proinflammatory cytokine responses are diminished in mice deficient in mannose 6-phosphate/insulin-like growth factor II receptor signaling. In mice, systemic infection with Salmonella typhimurium causes a transient accumulation of bone marrow-derived myeloid cells in the spleen. These myeloid cells are recruited from the blood into the spleen and accumulate in the red pulp where the cells contribute to the proinflammatory cytokine production that becomes evident during the first day after infection. Mannose 6-phosphate/insulin-like growth factor II receptor (M6P/IGFIIR) is expressed on leukocytes, and its deficiency has been shown to ameliorate immunopathology in several murine models, but its effect on the cytokine responses in these models is unknown. Here, we studied the effect of systemic M6P/IGFIIR deficiency on the systemic inflammatory response after infection with S. typhimurium. The number of splenic myeloid cells was significantly smaller in M6P/IGFIIR-deficient mice, and this reduction was linked to a reduction in splenic production of IFN-gamma and TNF-alpha. In addition, M6P/IGFIIR deficiency reduced the splenic IFN-gamma response to systemic challenge with Nippostrongylus brasiliensis, a parasite that causes granulomatous inflammation. These data show that M6P/IGFIIR signaling facilitates inflammatory responses in vivo by directing leukocytes to sites of bacterial and helminthic challenge and by supporting the induction of IFN-gamma production.Trump's embrace of Putin is antithetical to US values and undermines interests vital to US national security, but Congress won't take action to stop him. Michael Kovrig / (CC BY-NC-ND 2.0) Trump's blithe embrace of Russian President Vladimir Putin is antithetical to US values. It undermines US interests, undermines US credibility, and invites deeper crisis in US-Russian relations. That's what Secretary of State Mike Pompeo said at his confirmation hearing. It's also a bipartisan affront to Congress, which must act to protect US foreign policy. We have an opportunity, even a responsibility, to turn this around before it'

Q: How to use Linq in C# to sort an array? I have an array of objects in C#, and I'm trying to sort it by property using a Linq statement. Here's my code: ThemisArchive[] oArchives = (ThemisArchive[])File.ReadAllLines(pathToArchive); //Need to sort this array by dateTimeModified property oArchives = oArchives.OrderBy(s => s.dateTimeModified); I get the error message: "System.Collections.Generic.List' does not contain a definition for 'OrderBy'" I'm new to C# and Linq, and I have absolutely no clue how to get around this problem. Can anyone help me out? A: Why aren't you using the.NET Framework's built in array sort capability? This is much easier than trying to rework the framework to use a different API that just isn't built in. A: The sort is called LINQ, not order. All you need is var ordered = oArchives.OrderBy(s => s.dateTimeModified); If you want this to happen automatically, then declare your own extension method: public static IEnumerable OrderBy(this IEnumerable items, Func keySelector) { return items.OrderBy(keySelector); } Note: orderBy is a reserved word in C# so it is not allowed to use it as the name of a method. A: using System; using System.Collections.Generic; using System.Linq; namespace ConsoleApplication1 {
