I'm a flower like no other who has made her way to the forest and is waiting for my sun to shine. I am the light of the forest. What else should I tell you? I was born right here, and you should too! p.s. I'm a pretty pink polar bear p.p.s. My dear forest friends, you might want to avoid the Owl tree during this particular season of the year. The quest is what you want it to be. I'm in the final stages of planning Myrnethon 3 and Song of the Myrne 2. This game is the first step in this new series (in my humble opinion the best one so far, though). Song of the Myrne 2 will take place 6 months after the events of the game. songofthemyrne2.tumblr.com For more information about the song of the Myrne series, you can visit my tumblr page: songofthemyrne.tumblr.com This is the first and only one. What else? You can download the demo (links on the bottom of the page) and try the game for free. The game is fully playable on Steam. But be careful, the game is short, it won't take more than 15 minutes to beat. It's more of a filler than a complete game. This is a first-person action-RPG. I've made the demo with the intention of testing the MASSIVE feature of the game engine I'm about to release. I wanted to publish it for free for whatever reasons, and then I'll make a proper game with it. I'm also thinking about releasing new content of the game as soon as I'll be able to do so (again, next season, that's what happens when you're an indie artist). I hope you'll like the game, it's completely hand-crafted, don't forget about that. Myrne: The Quest is a first-person action-RPG. You can download the demo (links on the bottom of the page) and try the game for free. I was chosen to be the best indie game developer of the game jam "Ludum Dare XXIV", a personal project I had in mind for a while. Song of the Myrne: What Lies Beneath was chosen as one of the best games of 2011 (the first one). The game took place several hundred years before the events of the song, in an already ravaged world. The world is ravaged by monsters and environmental disasters (an asteroid strike a couple of hundred years before the events of the song), so the civilization fell into a dark age. There's no more than some scattered city-states. But that time changed, and our character, searching for the source of the troubles that plague our world, discovered a city and seemingly a civilization untouched by death. Included the ' c9d1549cdd
