Insurance Risk Database Insurance Risk Database Insurance is one of the most important risk management tools. It helps protect a business by minimizing its potential losses. If there is a fire at your business, its insurers will reimburse you for any losses incurred and usually will pay the entire amount in a lump sum. I'm sure you know that you can't buy fire insurance. Instead, you get a policy from your insurer (also known as a policyholder) that provides coverage for the benefits listed in the contract. The contract generally tells the insurer what it will and won't cover. Insurance companies generally tailor their policy to fit the type of risk you are insuring. This type of insurance is an exchange of money for risk. The insurance company pays a premium for the risk, and when that risk
