## **THE DARK DWELLERS Crack + [Mac/Win] Latest**

A class with quite the toolbox to work with. Several common types of dice are available, as well as a variety of cards with all kinds of effects for you to use. Once a character receives a weapon from the Secret Weapons Project, they'll find themselves with a dedicated skill to activate it. This skill doesn't replace other skills the character might have. It just gives them a way to activate the weapon. It's a similar idea to how Cantrips can function as part of a character's action economy. Once a character has a weapon equipped, they can also trigger a custom action for that weapon. They can even trigger this action multiple times. The Weapon Master skill provides a different focus each time. Secret Weapons Project is an additional skill that can be used when a character activates one of their class' weapons. It functions very similarly to a basic skill, giving a character a +1 on their normal attack and a +2 on their weapon's damage (as a result of the weapon's bonus). Depending on the type of weapon the character receives, this skill can be modified to suit their playstyle. Each weapon has a Damage Die, a Wound Die and the damage that the weapon deals is determined by these two dice rolled together. While the default weapons have 4 Damage Dice and 1 Wound Die, the expanded weapon system for the Secret Weapons Project provides the option to take some of the weapon's Damage Dice and give them to the character's Wound Die, increasing the Wound Die's total number of damage options. This isn't a "free" skill, but is an in-house perk that costs the character a little bit of their character pool. Another option for modifying the weapon's effectiveness is to take all of the weapon's Damage Dice and replace them with a new Die that has a lower die value. This Die has its own modifier applied to it, increasing or decreasing the damage it can deal. For example, if the character uses the Kaiga shotgun and gives its Damage Dice to their Wound Die, they would receive a 1d4 Wound Die with a +1 modifier (assuming the modified damage die is a 1d8). If the character replaces all of its Damage Dice with a 4d4 Damage Die with a -2 modifier, they would receive a 1d4
