Lung cancer is a major cause of cancer deaths and most cases are not detected at an early stage. Therefore, novel preventative and therapeutic measures for lung cancer are needed. Magnesium (Mg) is an abundant divalent metal that is present in all tissues. In the body, the divalent cations Mg(2+), Ca(2+), and Zn(2+) are involved in many of the cell processes. Mg deficiency is associated with both tumor promotion and the development of lung cancer. However, the mechanisms underlying the anticancer properties of Mg are not fully understood. Mg has been shown to inhibit the growth of non-small cell lung carcinomas in vitro and in vivo. The purpose of this review is to provide a comprehensive overview of the studies addressing the role of Mg in the formation and progression of lung cancer in animal models. Additionally, the relevant properties of Mg, such as its transport and the interactions with other metals, are discussed. Furthermore, the proapoptotic and anti-inflammatory effects of Mg in lung cancer are also explored. This review identifies potential ways to manipulate Mg in the lung cancer and the potential of Mg to prevent and treat lung cancer. Kuroda took on the role of "Mira," a character that incorporates artificial intelligence in conjunction with "human body parts", in the short film 7 to 9. The film is part of the "Cyber Hero" series, an independent production based on playwright Mamoru Hosoda's original manga set to be released later this year on Netflix. Hosoda launched the manga in Shogakukan's Big Comic Spirits in 2000 and has published 10 volumes. Cyber Hero is an international project released in association with London-based PR agent SHIFTLabs. Cyber-punk is a sub-genre of science fiction focusing on the interaction between humans and machines. Its prevalence in literature and films is perhaps due to its common use in describing those living in fast-paced, technological societies. Mira's storyline follows the several patterns for a typical cyber-punk story - theft, hasty escape, and identification of her kidnappers. After stealing from a gang, she gets caught and has to escape from the police before going on the run. Her final act is to disable the gang's money laundering operation in order to keep her family from getting hurt. This
