Play the Mafia Wars Mobile game, a free game from the makers of FarmVille, Mafia Wars and Facebook. Set your own goal: low scores, high scores, first-to-ten...Q: Does 'this' refer to any object in this case? I have three files: service.js: service = function () { var x = "hello"; var y = 'hi'; this.sayX = function (arg) { alert('X:' + arg + x); }; this.sayY = function (arg) { alert('Y:' + arg + y); }; }; main.js var sayY = new service; sayY.sayY('Hi there!'); alert(sayY.x); service2.js: service = function () { this.setSayX = function (arg) { this.x = arg; }; }; var sayX = new service2; sayX.setSayX('Hello'); alert(sayX.x); alert(sayX.sayX('The same')); When I run main.js, I get two alerts: 1. X: helloX. 2. Y: hi So, if the definition of sayX is in service.js, I am guessing it would be 'this' refers to service. This is weird. Now, if I go to service2.js and I do: alert(sayX.x), I get undefined. This implies that it is something like: this.x =... But this is not the case. It is not working in service2.js because 'this' refers to service. Can someone explain me why? A: In service, this is set to the instance of the function that is the constructor. But in service2, this is set to the object that service is the constructor of, and does not point to the constructor function itself. That is why service2.x is undefined. To make it work, you need to update service2 to have a this that is a reference c9d1549cdd

Detective Di (Larry Rosen, Robert Clouse) are a detective team from an alternate 1891 era Los Angeles with different discoveries, methods, and results. The team consists of 2 male detectives (Larry and Nick) and 2 female detectives (Dixie and Rosie). In Season 1, Episode 14 "The Wool Glasser", Larry and Nick break up with Dixie and Rosie, forming a new partnership. Their leads tend to be cases that the L.A.P.D. couldn't solve such as murders that occurred in the late 19th century. In Season 2, Episode 2 "The Ingredient of Murder", Larry and Nick asked to be reassigned to field and they begin hunting for the long-retired Joe (Larry Douglas). Joe was a detective from the early 1850s. John John (Edwin Bernal) is Larry's left breast and Nick's right breast, both of whom are female detectives. Edwin works at the L.A.P.D. as a police officer and there is only a mention of his male identity in his first two appearances. He and Dixie had been dating but was having second thoughts because of the animosity from Nick. He is a very sensible detective. According to the pages of Isaac Adler's diary, John's mother was born in 1850 and his father in 1848. Nicky Nick (Dominic Purcell) is Larry's right breast and Dixie's left breast. He is a cowardly detective who is sexist and racist toward the women's rights activists. Nick has a specific romantic interest in Dixie and reacts badly when she falls in love with Larry. The pages of Isaac Adler's diary give the following bits of information about Nick's family: Nick's mother was born in 1860 and his father in 1844. According to Nick's FBI arrest record, a former FBI agent named "Robert Charneski" assisted in Nick's recruitment into the CBU. It is unknown what the relationship between Charneski and Nick is, but Charneski would later split away from the FBI. Nick has stated that he was recruited into the National Security Agency by Spiro in order to find Nick's missing father. This information is backed up by a recording on the ring worn by Spiro, which speaks of a "young man." It is unclear whether there is any relationship between the Nick from the 1840s and Nick from the 2030s.

The all-new Disaster Report series is on the ropes. Just like real-life news, the outcomes of disasters are rarely as rosy as the dramatic headlines imply. The Disaster Report series is developed by Disaster Report makers, Nippon Ichi Software, and produced by top-quality talent, Monkey, for dedicated fans. New Disaster Report 4: Summer Memories, or DR4, provides an exhilarating new take on the series with its characters, graphics, and gameplay. The summer-centric setting means enemies come out in force - but that's what disaster times call for. With the Japanese countryside parched, the sun shines bright for all, and it's time to gather whatever friends and family are left and enjoy summer together! Record of Agarest War - The long-awaited and controversial sequel to the masterpiece Nippon Ichi Software Ltd.'s groundbreaking PS2 RPG, Record of Agarest: Generations of War is here at last. After a detailed debate in the Disgaea development team about the direction the game should take, Level-5 finally chose to adhere to the original Agarest philosophy. The result is an incredibly deeper, more mature story, with more intricate character interactions, and a world that gives the game's characters greater individuality and depth. In addition, the game also sees the return of the "network system" that was first introduced in Disgaea 2. The system features several enhancements, making it an even better fit for the PSP than its predecessor, but the most attractive aspect of the network system is the ability to share content. A game's save files can be shared between players via the internet or with a memory card, allowing for a seamless gaming experience without having to worry about remapping your memory card. Even better, the save files can be used to start a new game without having to wait for the game to load. What's more, using a memory card, users can upload additional data to the main save files. In addition to the improvements in networking, the network system has been expanded to include a "Connect Online" feature that lets users invite up to four of their friends to join them online for co-op games. While co-op is the primary focus of the game, non-co-op features, such as "the wingmen system," have also been overhauled. The secret behind this system is that through co-op and networking, various characters from the
